
Job Title: Product Owner - MRO (Airlines Industry)

Location: Chennai

Company: Siddhan Intelligence Private Limited

About Us: Siddhan Intelligence is a leading software product company specializing in innovative solutions for the aviation industry. Our mission is to enhance operational efficiency and streamline processes through cutting-edge technology. We are seeking a talented and experienced MRO Business Analyst from the airlines industry to join our team as a Product Owner.

Job Summary: As a Product Owner, you will leverage your expertise in Maintenance, Repair, and Overhaul (MRO) operations within the airlines industry to drive the development and enhancement of our software products. You will work closely with cross-functional teams, including developers, designers, and stakeholders, to ensure our products meet the needs of our clients and deliver exceptional value.

Key Responsibilities:

- Act as the primary liaison between the development team and stakeholders, translating business requirements into actionable user stories and product features.
- Utilize your deep understanding of MRO processes and challenges in the airlines industry to guide product development and prioritize features.
- Collaborate with stakeholders to define and prioritize the product backlog, ensuring alignment with business goals and customer needs.
- Conduct market research and competitor analysis to identify opportunities for product improvement and innovation.
- Develop and maintain a clear product roadmap, ensuring timely delivery of features and enhancements.
- Facilitate agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, to ensure efficient and effective development processes.
- Provide regular updates to stakeholders on product progress, milestones, and any potential risks or issues.
- Gather and analyze feedback from users and stakeholders to continuously improve the product and enhance user satisfaction.
- Stay up-to-date with industry trends and advancements in MRO and aviation technology to inform product strategy.

Qualifications:

- Bachelor's degree in Business, Engineering, Computer Science, or a related field.
- Proven experience as a Business Analyst in the airlines industry, with a focus on MRO operations.

- Strong understanding of MRO processes, challenges, and best practices within the aviation sector.
- Previous experience in a Product Owner or similar role in a software product company is highly desirable.
- Excellent communication and interpersonal skills, with the ability to collaborate effectively with cross-functional teams and stakeholders.
- Strong analytical and problem-solving abilities, with a keen attention to detail.
- Proficiency in agile methodologies and tools, such as Scrum or Kanban.
- Ability to manage multiple priorities and deliver results in a fast-paced, dynamic environment.
- Passion for technology and innovation, with a commitment to delivering high-quality software products.

Benefits:

- Competitive salary.
- Comprehensive health insurance
- Flexible work hours and remote work options.
- Professional development opportunities and career growth.
- Collaborative and inclusive work environment.

How to Apply: Interested candidates are invited to submit their resume and a cover letter detailing their relevant experience and why they are a great fit for this role to hr@siddhanintelligence.com
