## TEST AUTOMATION ENGINEER

### Company Overview:

At Siddhan Intelligence, we're a young, dynamic team using cutting-edge tech to solve real-world problems in aviation and logistics. If you're passionate about innovation and growth, you'll feel right at home here.

### Job Summary:

We are looking for a test automation engineer with at least 2-4 years of experience. We are looking for a passionate tester who is capable of designing and writing test automation scripts using JS. We value our professionals, providing comprehensive benefits, exciting challenges, and the opportunity for growth. This is a permanent position, and we are looking for someone to start immediately.

**Work Location:** Bangalore

**Experience :** 2-4 years

### Roles and Responsibilities

- Identifying and selecting the automation test cases
- Applying various designs and documenting the automation test strategy
- Creating an automation test plan and getting approval
- Automating the design of a framework
- Implementing it as per the structure of the project
- Creating, enhancing, debugging, and running the test cases
- Collating and monitoring the defect management process
- Managing the changes and executing regression tests
- Coming up with exact solutions for problems related to object identity and error handling

### Job requirement:

# Siddhan Intelligence

*Innovate Your Journey*
